

Weaving Handmade Jellyfish

During the summer vacation, I did a lot of meaningful things, but the most impressive thing for me was weaving handmade jellyfish.

That Sunday, I was lying in bed feeling bored. Suddenly, I remembered that I had a jellyfish knitting material package that I had not made. So, I found the materials package. The material package contained a ball of wool, a ball of cotton, a pack of thread, a red thread, a crochet hook, three marker buttons and a plastic needle. It also had a tutorial video.

Next, I watched the tutorial. When I first watched the people weaving jellyfish, I was so dazzled that I didn't know if I could do it well. Mother encouraged me to try. After listening to my mother's encouragement, I watched the knitting video seriously. Gradually, the jellyfish was finally made.

Looking at my finished product, I was so happy. Without my mother's encouragement, I might have never been able to weave my jellyfish.

During this boring summer vacation, weaving jellyfish added some fun and sense of accomplishment to my life.
